SIH 2025 National Finalist — Full-Stack Developer (React, Node.js, FastAPI)

OBJECTIVE

Final-year CS student who builds and ships full-stack web apps end to end — React on the front, Node/FastAPI on the back. Comfortable with Git, REST APIs, and debugging real production issues, not just tutorial projects. Looking for an entry-level Web/Backend Developer role where I can keep building things people use.

PROJECTS

DevSync AI — Real-Time Collaborative AI-Powered Cloud IDE 07/2026

dev-sync-ai-web.vercel.app

- Split the app into a Turborepo monorepo — a React 19 frontend, a Node.js/Express gateway, and a separate Python FastAPI service for AI — mainly so the AI workloads couldn't slow down the editor itself.
- Got real-time multiplayer editing working with Yjs (CRDTs) over WebSockets — the hard part was live cursors and presence syncing correctly when two people edit the same line at once.
- Built a multi-agent setup where separate Planner,Coder, and Auditor agents split up a coding request instead of one model doing everything — supports OpenAI, Claude, Gemini, and local Ollama models, with a RAG layer (ChromaDB) so answers are grounded in the actual codebase, not guesses.
- Added a real in-browser terminal (XTerm.js) wired to live Docker containers, a visual Git panel that writes its own commit messages, and an admin view for RBAC and system health.

AI Tool for Early-Stage Dementia Detection — Backend Developer 11/2025

demdoctor.qzz.io

- Built the backend for a platform that runs 5+ different cognitive tests, using FastAPI, PostgreSQL, and SQLAlchemy to handle attempts, scoring, and auth.
- The audio side was the tricky part — recording in the browser, converting it with FFmpeg, then pulling out speech features with Librosa and Praat-Parselmouth, all in under 2 seconds.
- Ran into a lot of file-upload edge cases early on and ended up writing proper exception handling for them — it's tracked 100+ test attempts since with no data loss.
- Wired the frontend and backend together with REST APIs so transcription and randomized tests feel instant instead of laggy.

Pokédex Explorer — React.js, Tailwind CSS, Context API, REST API 05/2025

pokemon-website-chi-inky.vercel.app

- Pulled live data for 1000+ Pokémon from the PokeAPI and rendered it in a responsive UI that actually works on mobile, not just desktop.
- Switched from prop-drilling to Context API partway through once the component tree got messy — made state a lot easier to debug.
- Added Next/Previous pagination so users aren't stuck scrolling one long list.

Rent-Vortex — Full-Stack MERN Car Rental Platform 12/2024

rent-vortex.vercel.app

- Built a peer-to-peer car rental app with three separate roles (Host/Renter/Admin), each with its own permissions — JWT auth plus bcrypt for password storage.
- Built the booking flow with React-Leaflet and OpenStreetMap so users can see real car locations and availability on an actual map, not a dropdown.
- Noticed the app was re-rendering way more than it should — fixed it with React.memo and cleaned-up useEffect hooks, plus Axios interceptors for auth token handling.

SKILLS

- Languages:** Python, JavaScript/TypeScript (ES6+), HTML5, CSS3, C
- Frameworks & Libraries:** Node.js, Express.js, FastAPI, React.js, Tailwind CSS, Prisma ORM
- AI/ML:** LangChain, RAG pipelines, Multi-Agent Systems, Multi-LLM Integration (OpenAI, Claude, Gemini, Ollama), Vector Embeddings
- Databases:** MongoDB, PostgreSQL, MySQL, Redis, ChromaDB (vector DB)
- Practices & Tools:** Git/GitHub (feature branches, PRs), Docker, WebSockets, CI/CD basics, Postman, Agile workflows, responsive/cross-browser testing, debugging, JWT Auth, Render, Vercel
- Soft Skills:** Teamwork, communication, decision-making under deadline pressure

ACHIEVEMENTS & CODING PROFILES

- Smart India Hackathon (SIH) 2025 — National Finalist**, one of the top teams out of 500+ that entered.
- CodeChef:** 1318 rating, 150+ problems solved | **LeetCode:** 50+ problems solved
- Hacknovate 7.0 and Hacknoccino 4.0 — built and presented working prototypes under a hackathon clock.

EDUCATION

- ABES Institute of Technology (ABESIT), AKTU** — B.Tech, CSE | 2023 – 2027
